**** If Top Braces and lids are required ADD 7% (or multiply price by 1.07)**

Custom Metric sizes are available as required subject to engineering specification limits.

Our suppliers can not at this stage provide 25mm Ultra Clear Glass so please consider 19mm the maximum thickness and sheet sizes are 2440mm x 3660mm as these dimensions also need to be factored.

Holes which may be required are best done at the build * (\$40/hole, 20mm - 125mm).

* Hole sizes available: 20 22 25 28 30 32 35 40 45 50 55 60 65 70 75 80 90 100 105 125mm

We can also offer Tempering (Hardening) of the glass prior to assembly which increases the strength / integrity and greatly increases the resistance to scratching. **

**** NB:** 1) Glass hardeneing price on application only 2) NATA Cert AS2208 supplied
